

Phone2Queue Mobile Offline - User Manual

What is Phone2Queue Mobile Offline?

Phone2Queue Mobile Offline is a simple, easy-to-use app for recording shop sales, inventory counts, and stock receipts. The best part? **It works even when you don't have internet!**

Getting Started

Accessing the App

1. **Open your phone's web browser** (Chrome, Safari, Firefox, Edge, etc.)
2. **Go to the URL provided by your manager** (example: <https://phone2queue.azurewebsites.net>)
3. The app will load on your screen - **no installation required!**

 **Tip:** Bookmark this URL in your browser for quick access next time

How to Login

Step 1: Enter Your Username

- Tap the **Username** field
- Type your username (provided by your manager)

Step 2: Enter Your Password

- Tap the **Password** field
- Type your password

Step 3: Click Login

- Tap the **Login** button
- Wait a moment while the system verifies your credentials

Step 4: Select Your Shop

- A dropdown menu will appear asking you to **"Select Your Shop"**
- Tap the dropdown and choose your shop from the list
- **Note:** You cannot change shops between forms, so choose carefully

Step 5: View Login Information (Optional)

- After successful login, you'll see a **"Show Login Info"** button
 - Tap it to see your login details, shop count, and product count
 - Tap **"Hide Login Info"** to close it
-

Using the Three Forms

After you select your shop, you'll see three buttons:

Shop Sales Form

Use this form when **selling products to the shop**

Shop Stockcount Form

Use this form when **counting inventory in the shop**

Shop StockReceive Form

Use this form when **receiving stock from a reorder**

Form 1: Shop Sales ()

When to Use

When you're selling products from the shop

Step-by-Step Instructions

1. Select the Shop Sales Form

- Tap the  **Shop Sales** button

2. Add Products

- **Select a Product:** Tap the dropdown and choose a product
- **Barcode:** This auto-fills automatically - no action needed
- **Description:** Shows product details - read only
- **Enter Quantities:** You can enter quantities in three fields:
 - SSOLD Qty (Shop Sold)
 - SPSOLD Qty (Special Sold)
 - Mkt Qty (Marketing Quantity)
 - *At least ONE quantity must be greater than 0*

3. Add the Product to Your List

- Tap **+ Add Product**
- The product appears in the "Products in Batch" section
- Repeat to add more products

4. Remove a Product (if needed)

- Find the product in the "Products in Batch" section
- Tap the X button next to it
- The product is removed

5. Add Notes (Optional)

- Tap the **Notes** field
- Type any notes about this batch (e.g., "Rush order" or "Quality check needed")

6. Review and Submit

- Tap **Review & Submit** → button
 - Check that all information is correct
 - Tap  **Submit to Queue** button
 - A success message will appear with your Submission ID
-

Form 2: Shop Stockcount ()

When to Use

When you're counting product inventory in the shop

Step-by-Step Instructions

1. Select the Shop Stockcount Form

- Tap the  **Shop Stockcount** button

2. Add Products

- **Select a Product:** Tap the dropdown and choose a product
- **Barcode:** Auto-fills automatically
- **Description:** Shows product details
- **Enter Quantities:**
 - Sales Qty
 - Test Qty
 - Mkt Qty (Marketing Quantity)
 - *At least ONE quantity must be greater than 0*

3. Add Product to Batch

- Tap **+ Add Product**
- Repeat to add more products

4. Remove a Product (if needed)

- Tap the ✕ button next to the product

5. Add Notes (Optional)

- Type any observations (e.g., "Shelf damaged in aisle 3")

6. Review and Submit

- Tap **Review & Submit** →
- Verify all details

- Tap  **Submit to Queue**
-

Form 3: Shop StockReceive ()

When to Use

When you're receiving stock from a reorder/transfer

Step-by-Step Instructions

1. Select the Shop StockReceive Form

- Tap the  **Shop StockReceive** button

2. Enter Transfer Number

- **Transfer Number Field:** Type the transfer number (TN#) from your reorder document
- Press Enter or click outside the field
- The **Shop Location** should auto-fill
- If it shows an error, double-check the transfer number

3. Select Products to Receive

- Only products in this transfer will appear in the dropdown
- **Select a Product:** Tap the dropdown
- **Barcode:** Auto-fills
- **Description:** Shows product details
- **Enter Quantities:**
 - Sales Qty
 - Test Qty
 - Mkt Qty
 - *At least ONE quantity must be greater than 0*

4. Add Product to Batch

- Tap **+** **Add Product**
- You can add multiple products from the same transfer
- Once added, that product can't be added again (no duplicates)

5. Remove a Product (if needed)

- Tap the **X** button

6. Add Notes (Optional)

- Example: "Damaged items: 2 boxes" or "Short 5 units"

7. Review and Submit

- Tap **Review & Submit** →
- Check all information

- Tap  **Submit to Queue**
-

Important Rules

Quantity Requirements

- **ALL THREE quantity fields must NOT be zero at the same time**
- At least one must have a number greater than 0
- If you try to add with all zeros, you'll see: "  At least one quantity must be greater than 0"

Switching Between Forms

- If you have products in your batch and switch forms, **all unsaved products will be deleted**
- A confirmation popup will ask you to confirm
- Always submit before switching to another form

Transfer Number (Receive Form Only)

- Must be exact match
 - Must belong to your selected shop
 - If wrong, you'll see an error and need to try again
-

What Happens When You Submit?

Success

- You'll see a **green success message** with your Submission ID
- The system shows when it was submitted
- Your data has been sent to the queue
- You can now:
 -  **Back to Form Selection** - to fill out another form
 -  **Back to Login** - to logout

After Successful Submission

- Your product list **automatically clears**
 - Your notes **clear**
 - You're ready to create a new batch
-

Offline Capability (The Best Feature! →)

What is Offline Mode?

When you don't have internet, the app still works! You can:

-  Fill out forms
-  Add products
-  Enter quantities

- ☒ Write notes

What Happens When You're Offline?

- The app will **cache your login data** the first time you login online
- When offline, you can **use the app normally**
- When internet returns, your submitted messages **will be sent automatically**

Important Offline Notes

- **You must login at least once while online** for offline mode to work
 - Your **initial login requires internet** to verify credentials
 - Once logged in, you can work offline for several sessions
 - Keep your browser open - don't clear cache
-

Logging Out

To Logout:

1. Tap the  **Logout** button (appears in most screens)
2. Confirm "Are you sure?" popup
3. Your session ends
4. You'll return to the login screen

What Gets Cleared on Logout:

- ☒ Your current batch (unsaved products)
- ☒ Your notes
- ☒ Your session token
- ☒ Your temporary session data

Note: Your cached data remains for offline use if you login again

Common Questions & Troubleshooting

Q: What if I see "  Authentication failed"?

A:

- Check username and password spelling
 - Make sure CAPS LOCK is off
 - Ask manager to verify credentials
 - Try again in 30 seconds
-

Q: What if I made a mistake entering a product?

A:

- Tap the X button next to the product in "Products in Batch"
 - Add the correct product instead
 - Re-enter quantities correctly
 - Submit again
-

Q: What if I accidentally submitted with wrong data?

A:

- The data has already been sent to the queue
 - **Contact your manager immediately** with your Submission ID
 - They can help correct it in the backend system
 - Your Submission ID is shown in the success message
-

Q: What if the page freezes or becomes unresponsive?

A:

- Close the browser tab
 - Reopen the URL
 - Login again
 - Your unsaved batch will be lost, but cached data is intact
 - Start fresh
-

Q: What if I lose internet mid-way through a form?

A:

- **Don't refresh the page**
 - Keep filling out the form
 - When internet returns, the submit button will work
 - Your data will be queued
-

Q: What if I select the wrong shop?

A:

- Tap the ← **Back** button (appears in form selection or data entry screens)
 - You'll return to the login page
 - Tap the **Shop dropdown** to select a different shop
 - Choose the correct shop
 - No need to logout!
-

Q: Can I work on multiple forms at once?

A:

- **No** - only one form type at a time
 - Finish and submit one form completely
 - Then go back and select a different form
 - Switching forms deletes unsaved products
-

Q: What does "i Show Login Info" do?

A:

- Shows your username
 - Shows your sales person name and ID
 - Shows how long your token is valid
 - Shows number of shops and products available
 - **Does not affect the app** - it's just informational
-

Q: Why do I need a Transfer Number for StockReceive?

A:

- Links your received stock to the original order
 - Filters products to only show what was ordered
 - Prevents receiving wrong products
 - Helps track inventory
-

Q: Is my data secure?

A:

- ☒ Login requires authentication
 - ☒ Data is encrypted in transit
 - ☒ Service worker caches only locally on your phone
 - ☒ Logout clears your session
 - ☐ ⚠ Don't share your password
 - ☐ ⚠ Logout when done if using shared device
-

Tips for Success

Before You Start

1. **Have your shop name ready**
2. **Gather all product information** (barcodes, quantities)
3. **For StockReceive: Have transfer number available**
4. **Ensure good internet connection** for initial login

During Data Entry

1. **Double-check quantities** before clicking Add Product

2. **Use the quantity validation** - it prevents mistakes
3. **Add notes for anything unusual** - helps the team
4. **Submit as soon as batch is complete** - don't wait

Best Practices

1. **Login to the app once per shift** (on a device with internet)
2. **Work offline as much as possible** - no data fees
3. **Save your Submission IDs** - for tracking
4. **Report errors immediately** to your manager
5. **Logout at end of day** - especially on shared devices

Emergency Support

If Something Goes Wrong:

1. **Note your Submission ID** (if it was generated)
2. **Take a screenshot** of the error message
3. **Write down the time and date** it happened
4. **Contact your manager** with this information:
 - What form you were using
 - What step you were on
 - The error message (screenshot)
 - Your Submission ID (if available)

Summary of Three Forms

Form	When	Main Fields	Quantities
Shop Sales 💰	Selling to shop	Product, Barcode, Description	SSOLD, SPSOLD, Mkt
Shop Stockcount 📦	Counting inventory	Product, Barcode, Description	Sales, Test, Mkt
Shop StockReceive 📦	Receiving stock	Transfer #, Product, Barcode, Location	Sales, Test, Mkt

Need Help?

For Technical Issues:

- Restart your phone
- Clear browser cache (if not offline)
- Try a different browser
- Contact IT support

For App Questions:

- Refer to this manual
- Ask your manager
- Contact your shop supervisor

For Data Issues:

- Contact your manager with Submission ID
 - They can verify data in the backend system
 - They can make corrections if needed
-

Thank You!

Thank you for using Phone2Queue Mobile Offline. Your accurate data entry helps keep our inventory system running smoothly!

Questions? Ask your manager or shop supervisor.
